EXPERIENCE

Pandai Education Sdn. Bhd. **Kuala Lumpur, Malaysia**
Quality Assurance Engineer, Part-Time March 2025 – February 2026

- Led 6 release testing cycles**,** coordinating QA activities to ensure application stability before deployment.
- Supervised and guided QA interns, assisting with testing tasks, bug reporting, and documentation practices.
- Performed functional and regression testing for Android and iOS applications, identifying and reporting issues to development teams.
- Collaborated with developers and product teams to verify bug fixes and ensure feature quality before release.

Pandai Education Sdn. Bhd. **Kuala Lumpur, Malaysia**
Quality Assurance Engineer, Internship September 2024 – February 2025

- Conducted 12 regression testing cycles for Android and iOS applications over a span of 6 months, successfully identifying and reporting critical bugs to maintain product stability.
- Partnered with developers and backend teams to systematically resolve over 30 user-reported bugs, directly enhancing application performance across Android and iOS platforms during the internship period.
- Authored and maintained 3 comprehensive QA documents, detailing project timelines, bug fix logs, and test case reports to enhance team alignment and streamline the testing process.

EDUCATION

University of Technology MARA (UITM), Jasin **Malacca, Malaysia**
Bachelor of Computer Science (Hons.) Netcentric Computing. Current CGPA: 3.95 March 2025 - Present

University of Technology MARA (UITM), Raub **Pahang, Malaysia**
Diploma in Computer Science. Current CGPA: 3.91 October 2022 – February 2024

PROJECT

EcoXchange, AI-Driven Smart Recycling Management System, *Final Year Project | Personal Project*

- Proposed and designed EcoXchange, an AI-driven smart recycling management system aimed at improving recycling participation through automation and digital services.
- Created the system architecture and UI/UX prototype using Figma, including mobile applications for users and riders and a web-based admin dashboard.
- Completed Phase 1 development of the Admin Web Dashboard, enabling administrators to monitor users, riders, bookings, and recycling activity.

Iot-Based Smart Toilet System

- Led a team of four to develop an IoT-based smart restroom automation system to improve hygiene, energy efficiency**,** and user comfort in public restroom environments.
- Built the system using Flutter, Arduino IDE, and REST APIs to connect

SkillVora, Career Path Exploration System

- Led a team of four to build a web-based career exploration platform for students and fresh graduates.
- Implemented a resume checker feature to help users evaluate and improve their resumes.
- Built a career recommendation module that suggests potential career paths for SPM leavers and fresh graduates based on user input.

ACTIVITIES AND INVOLVEMENTS

- Participant, TAMING ICTFF8 2026, Capture The Flag (Cybersecurity Competition)
- Committee Member, Aduan dan Bantahan Committee, Student Representative Council (JPP) Election 25/26
